

A Ciba Expert Services Seminar

Extracting Value from REACH A Practical, Interactive Seminar East Rutherford (Newark), New Jersey, USA, June 9, 2009

The newly renovated Sheraton Meadowlands Hotel & Conference Center is just eight miles from mid-town Manhattan. New York City is just across the river and we are only 15 minutes from Newark Liberty Airport.

Event Summary

Industry focus over the last few years with respect to REACH has been on Phase-In substances, including aspects such as pre-registration, SIEFs, data sharing and consortia. With the REACH pre-registration deadline in the rear-view mirror, industry's focus is now shifting to the next phase of REACH registration. Registration under REACH is not just limited to Phase-In (existing) substances. Companies must also understand how to complete registrations for Non Phase-In (new) substances as well.

This seminar will provide a brief introduction to REACH and a summary of recent developments from the European Chemicals Agency (ECHA); however, the main focus is to help industry better understand the various elements associated with the registration of Phase-In and Non Phase-In substances under REACH and to begin extracting value from the legislation. The seminar will provide participants with an opportunity to hear industry experts who have practical knowledge in handling Phase-In and Non Phase-In substances and supporting companies along the supply chain. It is also a platform to share best practices, allowing companies to make sense of their obligations under REACH, while making the most from the reduced requirements and exemptions.

Why Participate?

- Hear recent updates from ECHA on the REACH regulations
- Learn about the next steps required for Phase-In substances
- Learn about the different possibilities for "exemptions" under REACH
- Gain experience in dealing with Non Phase-In substances
- Grasp ways to generate new/missing data in an intelligent way
- Hear about the Candidate list and how to be prepared
- Understand the interface between GHS/CLP and REACH

This event also gives the opportunity to communicate face to face with European experts in toxicology and risk assessment. These expert practitioners have hands-on experience dealing with clients and their REACH interpretations.
