

Air Pollution Control

Innovative solutions for industrial air emissions

- Industrial Waste Gas Management
- Emission Reduction Strategies and Concepts
- Solutions for Air Pollution Control
- Air Emissions Monitoring
- Integrated Pollution Prevention
- Air Emissions Permitting and Compliance
- Optimization and Trouble Shooting on Existing Facilities
- Asset Life Time Management

Air Pollution Control

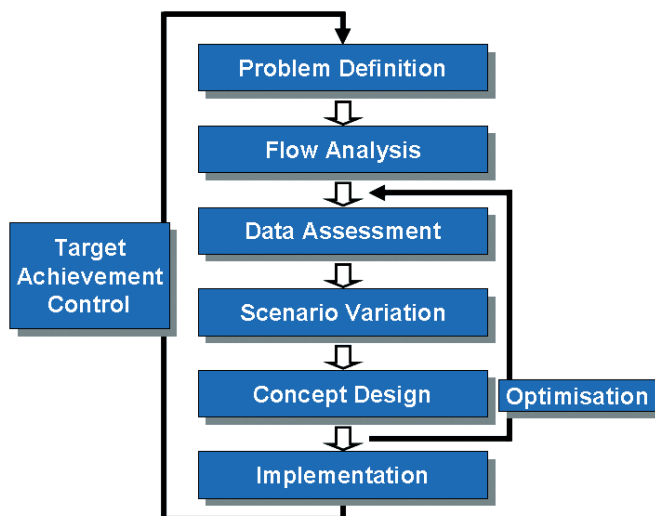

Your Advantage

- Our know-how and extensive experience in managing our own processes and emissions, including technology from absorption to thermal incineration of waste gases
- The ability to design and deliver an optimized solution to meet your specific needs
- Effective reduction of investment and operational costs, making your process more sustainable

Our Knowledge

We provide detailed planning, engineering and solution implementation for:

- Industrial waste gas management
- Emission reduction strategies and concepts (in-process)
- Custom made waste gas treatment advice, technology and safety concepts (end-of-pipe)
- Integrated pollution prevention and control strategies
- Air emissions permitting and compliance
- Diverse analytical techniques
- Occupational hygiene
- Energy and raw material recovery and consumption reduction

Our Experience

- Support for the chemical, pharmaceutical, cosmetics, personal care and food industries
- VOCs and inorganic compounds in waste gases
- Odorous waste gas
- Dust and aerosol separation
- Assessment of Best Available Techniques (BAT) and options for air pollution control
