- Data evaluation (Klimisch criteria)
- Collecting relevant data in the public domain
- CSA/CSR preparation
- Reviewing and revising classification and labeling
- Risk assessment
- Exposure assessment/scenarios

Ciba® Expert Services provides comprehensive solutions for meeting the highest environmental standards.

Ciba® Expert Services is an independent business unit of Ciba Specialty Chemicals. As a global organization, originating from the chemical industry we offer you consultancy services based on our experience from within the chemical industry. Expert Services are knowledge-based services delivering consultancy on environmental, safety and regulatory issues worldwide.

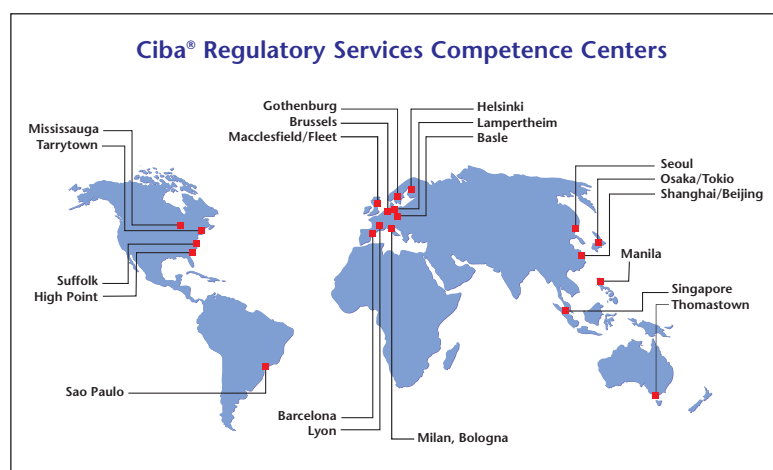

Ciba® Regulatory Services offers deep understanding of the European REACH regulation and REACH Implementation Projects as well as extensive knowledge of toxicology, ecotoxicology, environmental fate and risk assessment. We can assist you to optimize your efforts and resources necessary to fully comply with this Regulation. Our multi-disciplinary, regional teams of experts are involved in the delivery of REACH services, such as preparing technical dossiers, chemical safety reports, authorization dossiers, risk assessments and exposure scenarios.

Our specialists in Environmental, Safety and Testing have specific expertise on chemicals: life-cycle analysis, sustainability/resource efficiency, characterization of substances and complex formulations and phys-chem studies for potential P(BT) properties, powder safety and process safety. This expertise is available where necessary and strengthens our overall competence to deliver customer specific requirements.

Team work, expertise and experience will offer the best available solutions, so let our knowledge be your advantage.

Our experts are ready to help you comply with REACH

The REACH regulations will lead to the registration of approximately 30,000 phase-in chemical substances. Registration dossiers need to be prepared by industry over a period of eleven years starting on June 1, 2007. Material Safety Data Sheets need to be updated according to REACH requirements. Exposure scenarios need to be developed and risk management measures need to be implemented. This huge task will require expert services in many fields (legal, regulatory, toxicology). Ciba® Regulatory Services has over 150 experts available in 19 countries to assist you with this task.
