

Waste Water Treatment

Innovative solutions for the process industry

- Evaluation of Cost Effective Solutions
- Situation Analysis and Effluent Stream Assessment
- Treatability Studies and Biodegradation Tests
- Integrated Pollution Prevention
- Design and Engineering of New Treatment Facilities
- Troubleshooting and Optimization of Existing Facilities
- Wastewater Management and Source Control Concepts
- Benchmarking and Cost Optimization

Expert Services

Value beyond chemistry

Waste Water Treatment

Your Advantage

- We provide innovative waste water treatment solutions tailored to your requirements
- Our integrated approach considers both treatment and source control to deliver the most cost-effective solutions
- We cover the entire cycle from situation analysis to commissioning
- We evaluate the most effective technologies independently from equipment suppliers

Our Knowledge

- A multi-disciplined team of engineers, scientists and technical experts
- Decades of practical experience in industrial wastewater treatment
- Well equipped to carry out lab tests and pilot studies
- Valuable operational experience of modern treatment facilities all around the world
- Worldwide presence as well as knowledge of local requirements

Our Experience

- Practical know-how in the treatment of highly demanding waste streams from the pharmaceutical, chemical and cosmetics industries
- Extensive knowledge in a wide range of technologies such as biological treatment, membrane bioreactors, chemical-physical treatment and advanced oxidation
- Experienced in solving challenging problems such as the treatment of toxic and eco-critical waste streams
